

# Project Euclid for librarians

---

Project Euclid is a nonprofit, university-based online hosting platform for mathematics and statistics literature.

## Access Options

The journals, books, and conference proceedings hosted on Project Euclid can be accessed through one or more of the following models.

- ◆ **Single-title subscriptions**  
Some titles hosted on Project Euclid are available to libraries as single subscriptions, ordered directly from their publishers.
- ◆ **Open access**  
Over 70% of the content on projecteuclid.org is freely available to all.
- ◆ **Collections**  
Project Euclid offers two journal collections, **Euclid Prime** and **MSP on Euclid**.

*At this time, there is no way to acquire all Project Euclid publications through a single purchase.*

## Euclid Prime collection

Libraries can subscribe to **Euclid Prime**, a collection of over 30 titles in mathematics and statistics. Euclid Prime includes high-quality scholarship from independent publishers located around the world. It is a curated selection of the publications hosted on Project Euclid.

### The value of Prime

- Euclid Prime includes titles in applied mathematics, computer science, logic, mathematical physics, probability, and statistics.
- Key titles include *Abstract and Applied Analysis*, *Kyoto Journal of Mathematics*, *Publications Mathématiques*, and *Rocky Mountain Journal of Mathematics*.
- Researchers can access scholarship from multiple international publishers on one site with fully integrated search, discovery, and research tools.

---

## MSP on Euclid

on Euclid

In a joint partnership, MSP (Mathematical Sciences Publishers), Project Euclid, and Duke University Press offer **MSP on Euclid**, a collection of journals published by MSP. This collection, containing titles also bundled and sold by MSP directly, provides an alternative access option enhanced by the functionality of the Project Euclid platform.

### What you can do with MSP on Euclid

- Access COUNTER- and SUSHI-compliant usage statistics exclusively provided by Project Euclid
- Streamline the number of platforms your researchers use
- Receive perpetual access to purchased current content and term access to all available archival content

## Why support Project Euclid?

### Essential Scholarship

Project Euclid hosts some of the finest journals in their fields, including *Acta Mathematica*, *Annals of Statistics*, and *Duke Mathematical Journal*.

### Sustainable publishing practices

Founded in resistance to commercial publishing, Project Euclid helps small publishers remain independent, competitive, and affordable.

### Open access

All Euclid Prime journal content older than five years is made freely available. Thanks to subscribers, Project Euclid provides low-cost services to other fully open-access titles.

### Sensible collaboration between libraries and publishers

Project Euclid is a partnership between Cornell University Library and Duke University Press. Each partner provides expertise in how to balance the needs of libraries and nonprofit publishers.

### Diverse communities of researchers around the world

Project Euclid increases the visibility of journals based in global regions where the mathematics community is still developing, building a stronger, more diverse field of scholars.
